## ABOUT

The SiteRunner is a next-generation electric cart engineered for modern job sites. With a rugged tracked base and a powerful drivetrain, it effortlessly hauls up to **2,000 pounds\*** over uneven terrain.

Operated via a **wireless controller**, it gives crews intuitive, remote mobility that saves time and reduces strain.

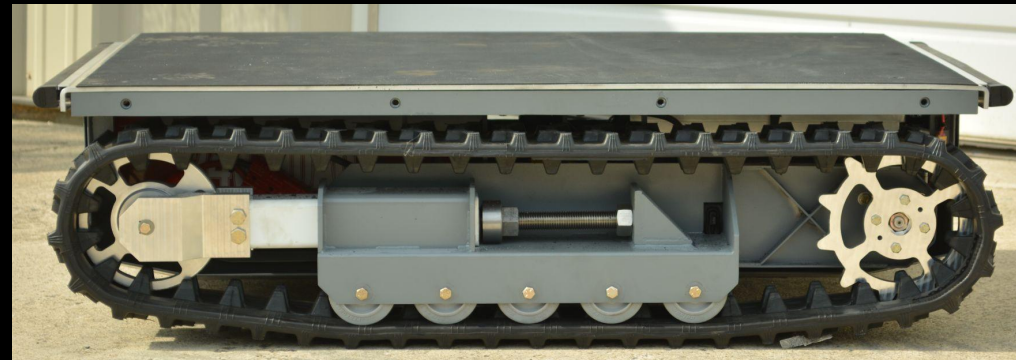

What makes SiteRunner truly unique is its **modular top interface**—designed to integrate seamlessly with optional attachments for stud grinding and welding—transforming it from a transport cart into a multifunctional workhorse.

\*Load capacity is model dependent

## RUGGED MOBILITY

With superior traction and a responsive wireless controller, the SiteRunner gives operators smooth, intuitive control: forward, reverse, speed adjustments, and pivot turns—all from a safe distance. **No cords, no pushing**—just effortless hauling across any terrain.

## MODULAR BY DESIGN

Designed for more than transport, the SiteRunner supports quick-swap attachments including the **StudCaddy** and **EasyGrind**—turning one platform into a multi-functional tool that adapts to any stage of the build.
